

Sale Name: Montana Ranch Frozen Genetics Sale Vol. 4

LOT 10 - DONNA 206 EMBRYOS

Donna 206 combines Rito 707 – the breed's common denominator in all modern performance genetics, with Donna 714 - arguably the most influential name in maternal genetics. Deep-sided and amply shaped with a great udder, superb feet and ideal breed character, Donna 206 carries a progeny record of BR 7@97; WR 7@103; YR 5@101, including Gibson 9111 working at Mystic Hill Farm, Jayhawk 1202 at Bullock Ranch and daughters at Brooking Angus Ranch; Ingram Angus; Brown's Angus Ranch; and Crooked Creek Cattle.

Lot 9 is sired by the popular maternal sire, Pathfinder, who is backed by five consecutive generations of Pathfinder dams.

Lot 10 is from the highly anticipated line-bred mating sired by the \$240,000 half-interest Rock 7200. The first Rock calves at Montana Ranch are standouts with solid growth and a great look.
