Breeder/Farm All Beef

Description

Something old and something new in this great, outcross mating! At 14 years old, GW Miss GPRD 038W, sired by 701T, is still going strong and ready for the next generation of young sires to keep her legacy alive. After producing the lot #1, lead off bull 4 different times with natural calves at Gateway Simmental in Montana, she has thrived in the donor pen producing some of the very best you will see in the upcoming sale season. Check out this planned mating for value! You should expect great growth, STAY, Docility and Top 1% MB with an IGS \$API value that calculates in the mid 180's. The RightMate evaluation for this mating says that the max for \$API could approach +200. Physically these offspring should be amazing as well with extra power, muscle, rib and physical appeal.

Quantity: 5
