Type 3 Conventional

Sire LCDR Reserve 210J

Sire Registration Number 3960639

Dam Hook's 94F

Dam Registration Number 3403406

Breeder/Farm JC Simmentals

Description

This mating simply has the chance to make great ones! LCDR Reserve should be the most highly used white-faced Purebred bull in the breed, because he is truly special. With a very outcross pedigree, genetic measures that rival any sire available and with great feet, structure, look and disposition, he has the chance to change the Simmental business. When you combine his potential with one of the best Purebred donors available, great things are bound to happen. Just check out the genetic proof on Hook's Fantasia 94F. She is absolute lightning. With breed topping values for CE, MCE, Milk, STAY, MB and REA and it no wonder that she puts up a +191 value for \$API. Physically too she is a prototype for practical and industry changing Simmental females. Moderate and heavy, with tremendous body dimension and being nearly perfect in terms of feet, structure and udder design, we simply need to reproduce her kind over and over. This flush has special potential.
