**Dam Registration Number** 18959366

**Breeder/Farm** Can Am Cattle Co

### **Description**

- A special and unique opportunity to tie into a young productive cow we are actively building around. 958's maternal potency, balanced genetic script, and strong production record (WR 4 @ 101; Calving Interval 4 @ 349) is our motive for basing a majority of our ET program around her. She sets the standard for what we are after in an Angus female — feminine power, ideal structure with a lovely udder. To date she has done an outstanding job. Her first son, Can Am Big Valley 208, was a feature in our 2023 sale, selling to Bud Koupal, SD. A beautiful daughter, Can Am Pride 308, was a highlight last year, but maybe her most intriguing is a SAV Resource 1441 son that will headline our 2025 spring sale. The door is wide open on a female poised to play a significant role in our program.

- The buyer is guaranteed a minimum of six (6) quality IVF embryos, with a maximum of 10 embryos, by the bull of the buyer's choice. Buyer is responsible for the cost of the semen and the flush work.

- Can Am Cattle Co., Shelbyville, IL, Lee Rincker (217) 827-9066"
